Balmain Fill
In extensions are an innovative method of adding volume, colour, creating texture or adding length to your natural hair, the possibilities are endless. The Balmain extensions come in a full range of colours both in natural and fantasy, 72 shades in total and 3 textures, straight wavy and curly, plus a range of dreadlocks, braids and hair accessories. Balmain Fill In extensions are suitable for just about everyone.

Prices

We are often asked to price extensions on the phone this is not possible, as the work needed to achieve the desired result may vary enormously. We would ask you read this section carefully and contact us on the same day that you wish to have your consultation. This consultation is Free and will take approximately 15 minutes.

If after the consultation you wish to proceed we will ask for a deposit of 25% of the quoted amount and a date we be set for your appointment.

For obvious reasons you must not change your hair colour between the consultation and the appointment.

The quote you receive at your consultation is valid for one calendar month, the deposit is non returnable and is forfeit if the appointment is not kept for any reason.

How Are They Applied ?

During the process a small, highlight size section is taken and added to a similar size section of your own natural hair, these are joined together using a wax bond. This bond will remain in place for up to three months and will not damage the natural hair in any way. The extensions last 3 to 4 months depending on the natural hair growth, after care and maintenance, The better care they receive the longer they last.

How Are They Maintained ?

During the 3 to 4 months it is normal to lose a few extensions or the odd bond may become visible, this is due to your natural hair growth. To compliment your home aftercare regime and help you keep your extensions beautiful, we recommend a regular maintenance visit to the salon (see Our Commitment To You). This could be every four to six weeks and your stylist will reapply any extension that has fallen out or become loose. This will ensure they stay looking great. We recommend a full removal after around three months. This is because as the extensions move down the hair shaft the bonds will begin to show and your natural hair loss is held within the extension bond. If they are not removed at this time it could cause damage to the natural hair.

Our Commitment To You

We at Chameleons want you to be happy with your extensions and to that aim with your first appointment we will provide the equipment (Balmain Extension Brush), the aftercare products (Chameleons Hair Extension Shampoo, & Chameleons Hair Extension Conditioner), We will also include within the quoted price a maintenance appointment after four weeks (so if any of the extensions do happen to come out keep them and we will put them back in) and also an appointment to remove the extensions at three months. All you should need to keep your hair looking fantastic.

All the products mentioned within this leaflet are available at reception.

Brushing

When brushing your hair it is always better to use a large soft bristle brush (see Our Commitment To You), this will ensure the hair does not snag or catch your extension bonds, which other types of brushes might. Using the recommended brush will leave the hair shiny and in optimum condition. We recommend you begin brushing at the ends of your hair, then move up to the mid lengths and finally brush the root area. At night gently tie your hair back in a loose braid or twist before retiring; this will help prevent tangles or knots.

Hot Hints

Do Not use Shampoos or conditioners that contain oils or fruit acids, such as wheat germ or citrus.

Using shampoos or conditioners with these ingredients could result in damage to your extension bonds.

When rinsing your hair, rinse for a few seconds extra as the extra volume created by your extensions will mean it takes a little longer to rinse.

Never sleep with wet or damp hair as it could affect the bonds or may cause the hair to tangle.

If you have an oily scalp wash it regularly, as a build up of natural oils could lead to your wax bonds slipping or falling out.

Cleansing

First brush your hair thoroughly (see Brushing), then soak your hair with warm water, it is important that you do not turn your head upside down while washing always wash your hair from the crown down. Next apply shampoo, We recommend using Chameleons Hair Extension Shampoo (see Our Commitment To You) . Distribute a normal amount of shampoo at the root area; gently massaging in small circles over the scalp, this will cleanse both the natural hair and the extensions.

It is not advisable to scrub the mid lengths or the ends as these will be cleansed sufficiently during the rinsing process and scrubbing them could cause them to tangle up.

You can now brush the ends using your soft bristle brush, this will help ensure every hair is coated thoroughly with conditioner. You should leave the conditioner treatment on for a minimum of three minutes and a maximum of ten minutes.

Once conditioned, rinse thoroughly with warm water, remember you will need to rinse for a little longer than usual as you now have more hair.

You should consider completing your after care routine with Balmain Aqualizer as a finishing spritz, or the Balmain Leave in Conditioning Spray. Also available is Balmain specialist Oil Treatment for the ends of the hair, this makes an excellent weekly treatment.

Rinse thoroughly and repeat as necessary but usually one wash should be sufficient.

Conditioning

To condition we recommend you apply Balmain Hair Repair treatment (see Our Commitment To You) every time you wash your extensions. Apply the Hair Repair to the mid lengths and ends only, do not apply to the scalp or the bonds, Gently massage, distributing the conditioner thoroughly.

Drying And Styling

You can leave the hair extensions to dry naturally or blow dry them, if using a hairdryer we suggest that you use a low heat and a soft bristle brush to style the hair extensions as other brushes may catch on the Wax seals, Once the hair is dry you may style using Carmen hot rollers, hot sticks, curling tongs or hair straighteners. These processes are not possible on synthetic hair extensions

Towel Drying

After rinsing squeeze excess water from the hair and wrap a towel around the head and gently pat towel to remove moisture from the hair, avoid rubbing the scalp or hair. Next gently brush your hair with the soft bristle brush, begin at the ends moving to mid length and finally the roots.

Removal And Re-Application

Removal is a simple procedure, which does not damage the hair in any way if performed by your extension stylist (see Our Commitment To You). A removal solution is applied to the Wax Bond, after pressure is applied the bond disintegrates and the extension is removed. Your hair is then brushed thoroughly and shampooed, conditioned and dried. Balmain guarantees the condition of the Human Hair extensions for 6 months when following the Balmain aftercare plan. They may last longer if they are properly cared for. The good news is that your extension stylist can reapply a percentage of the extensions using the Balmain Re-bond system. This reapplication is very cost effective, significantly lowering the cost of your subsequent hair extension application
